Times tables: emphasis on rapid recall and corresponding division facts.

It's important for children to know all the multiplication facts up to 12×12 and then transfer this knowledge to division facts. This will allow your child to have an instant recall of the facts and free up their memory for more challenging maths tasks. The children will undertake a national test in June and the expectation is for them to know all tables to 12×12 . Please ensure all children are practising ALL tables on a daily basis – on a walk, having dinner, in the car and online.

Reading Rocks! Class Journal

Reading: Your child is free to bring any book home from the book corner or the school library. We suggest reading at least 3 times a week as part of their home learning. Well done to the children who have completed our class journal so far - it is looking amazing.

This year we are hoping
to inspire all children to
read as many books as possible.

We are launching a
Reading Rocks! Class Journal.
Each child will have the opportunity to
take the journal home and add a page
about their favourite book!

Topic Activities are optional!
Your child can pick one or as many activities they wish, to complete at home.

Make a clock and practise telling the time - digital and analogue.	Keep a food diary and note down the food groups that you are managing to eat. Do you need to make some changes to ensure you have a well balanced diet?	Research and make a Travel Agent page about any city in the world you like.
Brush your teeth mindfully every day. Look at what you are doing, look at the bubbles, listen to the noises, notice how it feels. Make a chart so you can record this.	Make a video of yourself teaching the special tricks you know about remembering times tables.	Cook a healthy meal for your family and share photos of the process and final product.
