

WHAT CAN YOU DO AT HOME?

**Use everyday activities at home
to develop your child's understanding**

**The questions we ask can be divided in 4 groups,
going from easy to hard.**

**For instance if you ask 'what can you see?' it is much easier
than if you ask 'why is the girl crying?'**

1

**What can you see?
Who is on the picture?
What's happening?
Where is the...?**

2

**Which one do we
drink/eat/write with?
Find another one like this?
What is different about... and...?
How many....?
Tell me something else that is...
(understanding category- e.g. food)**

3

**Show me something that is not the same
What doesmean? (explain words)
What is thinking/feeling/ saying?
Tell me what happened ...**

4

**Why will this happen?
What made this happen?
What could you do if.....?
What could X do if.....?
How can we tell that.....?**

**These questions are a bit like detective work.
What can we see? What can we work out?**
